

ATRIUM<sup>®</sup>  
WINDOWS AND DOORS

HIGH-PERFORMANCE  
*Vinyl Replacement*  
WINDOW COLLECTION

*Aspirations*<sup>™</sup>  
COLLECTION

High-performance replacement windows that are beautiful and remarkably affordable are the result of our dedication to quality and our understanding of the real world requirements of everyday life. Aspirations™ windows are engineered and crafted to provide outstanding thermal efficiency, exceptional strength and lasting durability. The rigid, vinyl construction and fusion welded sashes and frames create windows that are as durable as they are beautiful. Aspirations™ windows are created specifically for your home and are backed by a Transferable, Lifetime Warranty.

THERMAL

# efficiency

## WARM EDGE INSULATING GLASS SEALANT SYSTEM

Between the glass panes is a high-performance sealant system with insulated spacers engineered to flex with the glass in hot or cold temperatures to resist sealant failure. The insulated spacers also help keep the edges of the glass warmer, dramatically reducing condensation while keeping cold air out and warm air in.

## OPTIONAL ENERGY SAVING EXTRAS

To ensure our Aspirations™ windows provide you with exceptional energy savings, Soft Coat Low-E Glass with insulating Argon Gas is available as an optional feature.

## LOW-E GLASS TECHNOLOGY

Low-E Glass is coated with microscopically thin, optically transparent metallic layers that reflect radiant solar energy while permitting visible light to pass through the glass. These invisible coatings provide amazing clarity and outstanding thermal performance.

In the summer, Low-E glass reduces heat gain from the sun to help keep your home cooler.

In the winter, Low-E glass lets warm solar rays in while reducing heat loss from your home.

## HIGH-PERFORMANCE, ENERGY EFFICIENT GLASS SYSTEMS

Aspirations™ windows are engineered with state-of-the-art glass technology to give you outstanding thermal efficiency. It all starts with premium insulated glass...double-strength glass separated by an optimal air space to create a 3/4" wide thermal barrier.

In cold, winter climates, the Low-E Glass helps keep rooms warmer by reflecting heat back into the home while letting warm, solar rays in. In hot, summer temperatures, the Low-E Glass lets visible light pass while blocking infrared and ultraviolet radiant solar energy. So your rooms stay cooler and you save on precious energy costs.

## LOW-E GLASS WITH INSULATING ARGON GAS

Argon Gas works like an insulating blanket between two panes of glass to further improve the thermal efficiency of Atrium windows. An insulated glass unit using Low-E Glass with Argon Gas provides the optimum insulating value for your home. Only available with Low-E Glass.

An added bonus of our warm edge, insulating glass sealing system is its ability to create a single seal that provides superior retention of Argon Gas. This system assures you of thermal efficiency that is performance-tested to be the best. Only available with Low-E Glass.

Atrium vinyl windows with Low-E Glass with insulating Argon Gas have earned the Energy Star rating.

THE BEST

# features

PROVIDE OUTSTANDING BENEFITS

Atrium vinyl windows are precision engineered to provide worry-free beauty and performance. Take a closer look at the many features that make Aspirations™ an exceptional value in quality window craftsmanship.

Available in:

- Nail Fin
- Replacement Flange
- Block Frame
- Brick Mould

**Fusion-welded frame and sash**  
minimizes air and water infiltration and enhances durability

**Low Profile Sweep Lock**  
engages metal reinforced mulling post for added security

**Metal reinforced meeting rail**  
creates a strong/secure interlock

**Integral vinyl lift rail**  
provides smooth, finger-tip operation of moving sash

**Full weather-stripping**  
helps prevent air infiltration into and out of the home

**\*Screens are flush mounted**  
and feature a continuous lift rail

Manufacturer reserves the right to substitute components as necessary.

**Replacement flange**  
engineered with heavy-duty dual wall construction (optional feature)

**Constant force balance**  
allows for easy movement of sash

**3/4" Insulated glass**  
provides energy saving thermal efficiency. Host of glass options available including Low-E glass with insulating Argon Gas

**Tilt sash**  
makes it easy to clean interior and exterior glass surfaces from the inside

**Integral vinyl interlock**  
features insulation strip that spans locking rail to seal out air and water infiltration

**Large multi-cavity vinyl chambers**  
help improve thermal performance and reduce the amount of outside noise entering the home. The noise deadening chambers combined with an air-tight design provide quiet comfort

**Attractive beveled exterior frame**  
adds a stylish accent to this easy care window made of premium, high-performance vinyl
